

CARATTERISTICHE

Tubo flessibile resistente agli agenti atmosferici.
Flexible hose resistant to weather conditions.
 Manguera flexible resistente a los agentes atmosféricos, torsión y gran resistencia mecánica.
 Tuyau flexible résistant à l'action des agents atmosphériques.

USO

Irrorazione a pressione di insetticidi e antiparassitari, passaggio liquidi a pressione, compressori.
Applications: spraying of insecticides and pesticides, conveying under pressure of fluids, air compressors.
 Fumigación a presión de insecticidas y antiparasitarios, paso de líquidos a presión, compresores.
 Utilisation: pulvérisation, passage de liquides sous pression, compresseurs.

STRUTTURA

In PVC plastificato con rinforzo avvolto in fibra poliestere. *In PVC plastificato in tre strati rinforzato da doppia magliatura in fibra poliestere.
Soft PVC hose with polyester yarn reinforcement.
***Three layers in soft PVC with double textile polyester reinforcement.**
 Manguera de PVC plastificado con refuerzo espiralado de fibra de poliéster. *de PVC plastificado de tres estratos reforzados por una doble malla de fibra de poliéster.
 En PVC souple avec renforcement spiralisé en fil polyester. *Trois couches en PVC souple avec double renforcement en fil polyester.
